

Amendments to the Specification:

Following is the specification as amended herein:

Please replace paragraph [0008] on page 2 with the following rewritten paragraph:

C¹ Figures 4a-c illustrate one embodiment of a docking station having a ~~convention~~-convection unit according to one embodiment.

/

Please replace paragraph [0023] on page 6 with the following rewritten paragraph:

C² In one embodiment, the docking station can have an aperture aligned with an aperture of the computer system exposing an area relative to a thermal spreader (e.g., water loop, loop heat pipe, or hinged heat pipe). As a result, the ~~convention~~-convection unit of the docking station can force air onto the thermal spreader, or alternative pull warm air from the thermal spreader, thereby performing the operations of remote heat exchanger, without adding to the volume of the computer system.
